Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: The site is located in an entirely residential area, as confirmed by the Council's own report, which states the surroundings are "predominantly residential". A large, high capacity community hub and place of worship is fundamentally incompatible with the character, scale and quiet nature of this neighbourhood, contrary to Sutton Local Plan Policies 28 (Character and Design) and 29 (Protecting Amenity).

The Council has already identified serious concerns about noise and disturbance, especially from up to 250 people leaving at 11pm and increased vehicle movements directly beside residents' gardens. This would significantly harm residential amenity.

Transport accessibility is extremely poor, with a PTAL rating of 1a, meaning the location is not suitable for a high traffic use. The Council acknowledges this and has highlighted the likely on street parking pressures and highway safety impacts, especially during Friday peak events, even after all on site spaces are used. This directly conflicts with Policies 36 and 37 of the Sutton Local Plan.

The proposed building would also appear visually out of place compared with the surrounding domestic properties, failing to integrate with the established character of the area, contrary to Policy 28.

Finally, there is no demonstrated local need for an additional facility of this nature. The applicant already has access to a large venue with extensive parking less than one mile away, and there are multiple mosques and community facilities within approximately 1-1.5 miles of Belmont. As such, placing another intensive use in a quiet residential neighbourhood is unnecessary and unjustified.

For these reasons, I strongly object to the proposal and urge the Council to refuse any future application.
