Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing as a resident of Holland Avenue and as a medical doctor to express my strong support for planning application DM2025/01591.

From a healthcare perspective, I particularly value the proposed medical and wellbeing initiatives that the community centre intends to offer. Accessible health education sessions, preventative health workshops, mental health awareness programmes, and community wellbeing activities can play an important role in improving public health outcomes. Community-based initiatives often help reach individuals who may not otherwise engage with traditional healthcare services, supporting early intervention and reducing longer-term pressures on the health system.

In addition to the health benefits, I have reviewed the proposed plans and find the design to be thoughtful and proportionate. The scheme appears well considered, with no excessive increase in scale or height, and it respects the character of the surrounding residential area.

I am also reassured by the proposed parking management measures and the creation of additional parking spaces. The approach outlined in the application demonstrates a responsible and pragmatic effort to manage vehicle movements and minimise impact on neighbouring roads. This shows clear consideration for existing residents and local traffic patterns.

Overall, I believe this proposal represents a positive and carefully planned development that will provide tangible health and community benefits while remaining sensitive to its surroundings.

I respectfully ask the Council to approve planning application DM2025/01591.
