Comment Reasons:

Comment: I strongly support this application.

My home is only a short walk from the site - just a few houses away - so I will not need to drive. As a parent, this proposal is extremely important to my family. Having a safe, well-managed community center nearby means my children can take part in positive activities without long journeys, late-night travel, or additional traffic.

This development is also a clear improvement on the site's former 24-hour ambulance station use, which generated noise and vehicle movements at all hours. A controlled, community-focused facility is a far more appropriate and compatible use in a residential area.

I understand local concerns about parking and traffic, particularly around school hours. I am reassured that the application directly addresses this through managed scheduling, parking controls, and event planning designed to avoid peak times and minimize disruption.

The proposed building is modest, well designed, and in keeping with the surrounding homes. It will enhance community life while respecting the character of the area.

Overall, I believe this is a positive and balanced proposal that will benefit local families while protecting residential amenity.

I respectfully ask the Council to approve this application.
