Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I wish to formally object to the proposed change of use from an ambulance station to a place of worship due to concerns regarding traffic impact and public safety. The area already suffers from severe congestion, introducing a use that is likely to generate additional traffic at specific times, including evenings and weekends, would significantly worsen these conditions.

There is particular concern given the site's close proximity to a nearby school. Increased traffic volumes, on-street parking, and heightened pedestrian activity (considering children walking on their own to/from school) would pose an increased risk. The existing road network is already under considerable pressure, and the proposal fails to adequately address the cumulative impact on highway safety, access, and parking provision. For these reasons, I believe the development would be detrimental to public safety and the overall wellbeing of the local community.
