Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I strongly object to the application. The proposed site sits within a quiet residential area. Surrounding roads: Balmoral way; Dorset road; Avenue road; Holland Avenue and York road already experience significant parking pressure due to the close proximity to the popular Avenue primary school and number of nursing homes in very close proximity. We as residents already seen unsafe parking especially at school pick up and drop off times. In addition, staff from the school park in the roads. The proposed development does not appear to provide sufficient off-street parking to accommodate the potential numbers expected to be attending the centre. This is likely to lead to overspill parking in nearby residential streets, leading to obstruction of driveways, reduced road safety, and increased congestion.

Currently, the traffic caused by parents of children at the Avenue Primary Academy (with two entrances in Avenue Road & Dorset Road) presents significant problems to local drivers; pedestrians and local residents. Before and after school drop-off and pickup times, the local roads are jam packed with cars, with dozens of children trying to cross the road and buses; delivery vehicles & emergency vehicles being blocked. The fumes from the cars, and the noise of engines, doors slamming, and horns sounding are a constant nuisance. The parking around this time, due to the number of cars, is appalling, with parents parking on single, double, and zig-zag yellow lines, grass verges, low kerbs, and over resident's driveways. As a local resident of this area for many years I have observed this inconvenience and hazard associated with jam pack road where emergency vehicle & delivery vehicle being obstructed is on rise year after year. The applicant freely admits that 45% of their users will travel by car and there will be an additional 69 cars in the area at peak times and around 250 people visiting the place. Therefore, adding another public building without self-sufficient parking capacity will make the situation worst for the local residents; school kids/parents; emergency vehicles and all who use these aforementioned streets for

everyday commuting so any increase in traffic of any magnitude around this area would be completely unacceptable for public safety.

In addition, as admitted by the council itself the surrounding area is quiet residential areas. We mostly have families with young kids & elderly residents with primary school & nursing homes; the change of use will generate an increase in noise & disturbance from increased vehicles and large numbers of people in and out of the facility from morning to 11 pm at night which directly affect the residential amenity and emergency access to the area which is violation of public safety & health. I live with my young kids within few yards of this site. I am very concerned about road safety and also potential disturbance of sleep at night due to noise from constant movements of vehicles and large number of people as it is proposed to run as a busy facility until late night. For these reasons, I strongly object to the proposal and urge the council to refuse this application and any future application on the ground of its impacts on highway safety, parking, residential amenity and emergency access.
