Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing as a local female resident to express my strong support for planning application DM2025/01591.

From a woman's perspective, I particularly value the inclusion of a dedicated women's area within the proposed community centre. Having a safe, welcoming and accessible space designed to support women's wellbeing, learning and social connection is extremely important. Facilities that recognise and accommodate women's needs help foster confidence, participation and community engagement.

I am especially supportive of the proposed women's fitness programmes and wellbeing sessions, which will provide accessible opportunities for physical health, mental wellbeing and social interaction. These types of initiatives are vital in promoting healthier lifestyles and reducing isolation.

The inclusion of children's educational classes and a crèche facility is also a significant benefit. Many mothers face barriers to participation due to childcare responsibilities. Having a safe space where children can learn and be cared for while their mothers attend classes or fitness sessions will make the centre far more inclusive and practical for families.

Another key advantage is that the centre will be within walking distance of my home. This makes regular participation realistic and convenient, while also reducing reliance on vehicles and contributing to a more connected local community.

Overall, I believe the proposed development will provide meaningful social, educational and wellbeing benefits for women, children and families in the area. I respectfully ask the Council to approve planning application.
