Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing as a local resident to express my support for planning application DM2025/01591.

I understand that some residents have raised concerns about traffic, parking and school-related congestion. However, based on my own experience of the area, I do not believe the proposal would result in unacceptable impacts.

The site was formerly an operational ambulance station, which historically generated vehicle movements at all hours, including unpredictable activity. The proposed use would operate within defined and limited hours and would therefore be far more predictable and managed.

It is also important to note that the congregation and community activities have already been taking place nearby for several years without any noticeable impact on parking conditions, highway safety or the operation of Avenue Primary Academy. The prayers have been arranged in a rented space for a number of years with no issues. The Friday prayer times are staggered so as not to conflict with the school times.

I also welcome the creation of a community hub that will be open to the wider neighbourhood, providing space for family activities, education, wellbeing sessions and community support. Facilities like this strengthen social cohesion and offer positive opportunities for local residents of all backgrounds within walking distance.

Overall, I believe this is a sensible and well-managed reuse of an existing building, bringing clear

community benefit while remaining compatible with the character and functioning of the local area.
I respectfully encourage the Council to approve the application.
