Comment Reasons:

Comment: Dear Sir/Madam,

I am writing to support Planning Application DM2025/01591. I am a local resident and have lived in the area for more than seven years.

I strongly welcome the proposed community centre's focus on local well-being. Accessible programmes that promote health, social connection, and personal development are highly valuable for residents of all ages. The planned educational activities for children will also create meaningful opportunities for learning and wider community engagement. In addition, the dedicated activities and safe space for women will provide important support within the community.

The centre's location is particularly beneficial to me because it is within safe walking distance of my home. This will encourage walking rather than driving, reduce reliance on cars, and strengthen neighbourhood relationships.

It is also important to note that the site previously operated as a 24-hour ambulance station, with continuous vehicle movement day and night. The proposed change to a community centre with clearly defined, more limited opening hours represents a positive improvement for the area. It is likely to result in lower overall noise and activity levels than the previous use.

The building is modest in scale and appears proportionate and well-suited to its surroundings. The design respects the existing streetscape and is in keeping with the neighbourhood's character. I understand that there will be 12 on-site parking spaces, including 2 disabled bays, and cycle racks

to support sustainable travel. I also welcome the maintenance of the existing greenery.

I appreciate the parking management measures outlined in the application, including staggering Friday prayers and avoiding school drop-off and pick-up times. This demonstrates a responsible and considerate approach to traffic management. Overall, I do not believe the proposal will cause significant traffic, light, or noise issues.

For these reasons, I respectfully request that the Council approve Planning Application DM2025/01591.
