Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I strongly support this application to change the former ambulance station to a mixed-use Place of Worship (F1) and Community Hub (F2).

The proposal would provide significant benefits to the local community. It offers a much-needed focal point within walking distance for residents, particularly elderly people and families, helping to reduce isolation and promote community integration. The inclusion of youth programmes, children's educational classes, and wider community events will serve the whole neighbourhood.

The building's former use as an ambulance station generated traffic at all hours, including unsociable times. The proposed use would operate at defined hours and is likely to result in less overall traffic. Nearby church facilities have operated for many years without parking or traffic issues affecting neighbouring schools, demonstrating that similar uses can function responsibly in this area.

Management has also shown willingness to engage with local residents and address any concerns proactively.

Overall, this is a positive reuse of an existing building that will strengthen community cohesion and provide meaningful local benefits. I respectfully encourage approval.
