Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I strongly object to this proposal due to its location within a quiet residential area.

The proposed site is in very close proximity to Avenue Primary School, which experiences significant traffic and pedestrian activity throughout the day, particularly during drop-off and pick-up times. Introducing additional vehicles and on-street parking in this already congested area would create serious safety concerns, especially for young children who walk to and from the school.

As residents living very close to the proposed site, with children who attend Avenue Primary School, we would be directly and adversely affected by the increased traffic, parking pressures, and potential security risks. The presence of young children and elderly residents in the immediate vicinity further heightens these concerns. The safety and wellbeing of the local community must be prioritised.

I would also like to highlight that many of the residents expressing support for this proposal do not live in close proximity to the site and would not experience its day-to-day impact. In contrast, those of us who live nearby would be directly exposed to the increased traffic, congestion, and associated risks.

For these reasons, I respectfully urge the Council to reject this proposal in order to protect the safety, character, and quality of life of the immediate residential community.
