Comment Reasons:

Comment: I am a local resident and I would like to register my support for planning application DM2025/01591.

In my view, this is a sensible re-use of an existing site that previously served a public function, and it seems reasonable for it to continue in a community-serving role rather than remaining potentially unused or vacant/abandoned. The proposal is for a mixed-use community hub and place of worship, and it appears intended to operate as a community venue with regular activities rather than being limited to one purpose.

What I see as positive is the wider community use described in the submitted information. It includes provision aimed at different groups, such as activities for children and young people, mothers and toddlers support, and programmes for older residents, alongside broader community sessions. Having this type of facility locally can be beneficial in practical terms because it gives people access to organised activities and support within the borough, rather than needing to travel further away for similar services.

From a day-to-day perspective, the documents also suggest that access and on-site arrangements have been considered, including parking and cycle storage, and an approach to managing how the site is used at busier times. Based on my experience of the immediate area, the main pressure points on the roads are typically the school-run periods in the early morning and mid-afternoon. Outside of those times the area is generally quieter, which reduces the likelihood of routine community use causing noticeable traffic issues.

Overall, I consider the proposal to be a reasonable use of an existing site that would bring clear community benefit, and I support Sutton Council granting approval.
