Comment Reasons:

Comment: I am writing to express my support for Planning Application DM2025/01591.

I am a local resident and a father living in the area, and I am actively involved in community life locally. I care about how developments affect our neighbourhood, and having reviewed this proposal, I believe it represents a positive and appropriate use of the site.

The change of use from a former ambulance station to a mixed-use Place of Worship (Class F1) and Community Hub (Class F2) is, in my view, a sensible reuse of an existing building. The proposed extensions and adjustments to the height appear modest and proportionate. Overall, the building remains in keeping with the scale and character of the surrounding area.

Importantly, this is likely to be a relatively low-intensity use compared to other forms of development that could potentially come forward on this site. The scheme provides 12 on-site parking spaces, including 2 disabled bays, which shows that parking demand has been carefully considered. The inclusion of cycle racks also supports sustainable travel, and I welcome the fact that greenery on the site is being maintained, helping it blend into the local streetscape.

From a community perspective, the benefits are significant. The proposal includes space for health and wellbeing programmes, inclusive community use, educational programmes for children, and dedicated activities and space for women. As a parent, I particularly value the opportunity for structured educational and youth activities within walking distance of home. Facilities that support women's participation and wider inclusion are also an important positive aspect of this proposal.

I also understand that Friday prayer times are being staggered specifically to avoid conflict with local school pick-up times. This demonstrates a thoughtful and responsible approach to managing traffic and ensuring minimal disruption to neighbouring roads. Given the on-site parking, staggered attendance, and the nature of the activities proposed, I do not believe the development will result in significant traffic, noise, or light disturbance.

Overall, I consider this to be a well-balanced and community-focused proposal that makes good use of an existing building while remaining respectful of its surroundings. I respectfully ask the Council to approve this application.
