Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I strongly support the above application. This will benefit the local community immensely due to a number of reasons.

Being a GP, I understand the importance of the community support that is utterly needed for an ethnically diverse local population with diverse needs. We need to encourage more worship and community settings to support the local needs and reduce the inequalities locally. There is growing diverse population and needs worship and community centre which will support the mental health and also reduce loneliness.

The worship timings are usually in the mid afternoon and don't clash with the school timings and people leave before the school timings.

There are already traffic rules in place to deal with congestion which the local community has abided historically.

It will also help support our elderly parents who can find a place to mingle within the community supporting their frailty needs.

When available options for hospitals and community centres could expand their services by channelising and supporting vulnerable people for their needs to community centre.

This is an excellent location for all these reasons.
