Comment:Re: Planning Application DM2025/01591

Dear Sir/Madam,

I am writing to express my strong support for Planning Application DM2025/01591.

I am 67 years old and have lived locally for many years. At this stage of life, having accessible community facilities close to home is incredibly important to me. The proposed Community Centre would be within easy walking distance, which makes it especially valuable and practical.

As we get older, opportunities to socialise regularly and remain active within the community become increasingly important for maintaining both physical and mental wellbeing. A welcoming, safe and local venue where I can meet others of a similar age, take part in organised activities, and build friendships would make a meaningful difference to my daily life.

Many older residents can experience isolation, particularly if family members work or live further away. A nearby centre offering social gatherings, light exercise classes, discussion groups, and community events would provide structure, companionship, and purpose. Even simple activities such as gentle fitness sessions, table tennis, craft groups or educational talks can greatly improve quality of life and help maintain independence.

The centre would also create opportunities for intergenerational connection, allowing older residents like myself to remain engaged with younger families and the wider community. This

strengthens community cohesion and fosters mutual understanding across age groups.

Having such a facility within walking distance reduces reliance on transport and ensures that older residents are not excluded due to mobility or travel limitations. This accessibility is one of the most important aspects of the proposal for me personally.

I firmly believe this centre would enhance wellbeing, reduce isolation, and strengthen community bonds in the locality. I respectfully ask the Council to give favourable consideration to Planning Application DM2025/01591.

Yours faithfully,
Amna Khan
