Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: First of all I would like to say I completely support religious and minority community freedom of expression. As a member of the Sutton community I strongly support the planning application DM2025/01591, which aims to create a much-needed community centre of learning and understanding in our neighbourhood. I believe this development will provide significant benefits and aligns with the ideas of sustainable communities and local well-being endorsed by both national and local planning policies, including those from Sutton Council.

I fully support the proposed health and wellness programs, such as health clinics and proactive community health initiatives. Offering preventative healthcare, educational workshops, and wellness sessions will significantly improve access to important services for individuals and families. This effort directly addresses health inequalities and encourages healthier lifestyles, which are key goals in Sutton Council's Local Plan aimed at enhancing public health outcomes for residents.

In terms of concerns that might arise during the planning discussion, particularly regarding traffic and parking during school hours, I would like to offer some insights from a local resident's viewpoint. It is important to understand that the primary users of this proposed community center will primarily be existing members of our community, many of whom are residents in that area, who are the beneficiaries of the services provided and are not likely to increase traffic or parking problems.

Also from the proposed building and planning there is no indication that it will change the outlook of the overall community in anyway.

So I would recommend the planning committee to definitely approve and give the go ahead for this Community Hub to be constructed.
