Comment Reasons:

Comment: I am writing to express my strong support for Planning Application DM2025/01591.

I was born and raised in this area and have lived here for 18 years. This community is all I have ever known, and I care deeply about how it grows and develops.

As a young woman, I feel that having a welcoming centre so close to home would make a meaningful difference to me and others my age. It can sometimes feel challenging to grow closer to religion or become more involved in the community, especially without an accessible and supportive space. A centre just a one-minute walk away would remove many of those barriers. It would offer a safe and inclusive environment where young women can learn, take part in activities, build confidence, and form positive friendships. For someone at this stage of life, that sense of belonging and guidance can be truly transformative.

Beyond my personal perspective, the proposal has been thoughtfully designed to benefit the wider neighbourhood. The building is modest in scale and in keeping with the character of the area. It represents a low-intensity use compared to other potential developments and is unlikely to generate significant traffic, noise, or light disturbance. The provision of 12 on-site parking spaces and 2 disabled bays demonstrates that practical needs have been carefully considered.

In addition, the inclusion of cycle racks encourages sustainable travel, and the plans retain existing greenery, helping the development sit comfortably within its surroundings. It is also reassuring that Friday prayers will be staggered to avoid conflict with school pick-up times, showing awareness of local routines and a willingness to minimise disruption.

For these reasons, I believe this proposal would positively support young people like myself while remaining respectful of the wider community. I respectfully ask the Council to approve Planning Application DM2025/01591.
