Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment:- The current description of the proposal as a simple relocation of existing activities from Belmont Church is misleading, as the church is presently only used for Friday afternoon prayers.

- A dedicated place of worship would significantly increase the frequency and intensity of site usage, requiring activity five times daily, seven days a week, compared to the current limited arrangement.
- There are only three existing points of access to the old fire station site, which are not sufficient to safely and efficiently handle the projected increase in traffic and footfall.
- The site is close to Avenue School, in an area that already experiences severe parking shortages and high levels of traffic congestion.
- Introducing a full-time place of worship at this location would place unsustainable additional stress on local roads that are already heavily used.
- The associated increase in vehicle movements would heighten risks to the safety and security of children in the immediate vicinity, particularly at school start and finish times.
- Taken together, these factors mean the proposed location is not suitable or safe for the intended change of use.
