Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I am writing to formally register my objection to this planning application based on several critical planning concerns. My primary objection relates to Overdevelopment and Character; the proposed scale and intensity of use for this site are disproportionate to a quiet residential setting and would significantly alter the established character of the neighborhood. Furthermore, the Cumulative Impact on Highway Safety is a major concern, particularly given the site's proximity to a school; the additional vehicle movements at peak times will exacerbate existing congestion and create an unsafe environment for children and pedestrians. Additionally, the proposal lacks a comprehensive Noise Mitigation Plan, and the frequent movement of people and vehicles during unsociable hours-specifically early mornings and late evenings-will cause a significant loss of residential amenity and privacy for those living directly adjacent to the site. Finally, the Inadequate On-site Parking will force visitor vehicles onto already narrow surrounding roads, creating a persistent obstruction for emergency services and local residents alike. On these grounds, I believe the application in its current form is unsuitable for this location.
