Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing as a local resident and as a doctor to express my support for planning application DM2025/01591.

Over the past three years, our congregation has been meeting regularly at a nearby location, closer to Avenue Primary Academy, without any substantiated complaints, enforcement action, or safety incidents. This track record demonstrates that regular congregational activity can coexist responsibly with the surrounding residential area. The proposed new site would be slightly further from the school, yet continues to offer a controlled, time-limited, and managed environment, meaning it is unlikely to increase any existing risks.

Community facilities such as this play an important role beyond their immediate purpose. They provide a place for social connection, mutual support, and structured activity, all of which contribute positively to mental and social wellbeing. For families, older residents, and other community members, having a safe, accessible, and organised venue encourages engagement, reduces isolation, and fosters cohesion. It also creates opportunities for health and wellbeing initiatives, such as workshops or community education sessions, which benefit the wider neighbourhood.

Concerns regarding parking, traffic, and residential amenity are understandable. However, over the past three years, comparable gatherings have taken place without observable disruption or objection from the Local Highway Authority. Bus routes such as the S4 continue to operate safely, and on-street parking and network circulation have functioned without issue. This real-world operational experience demonstrates that the proposal can be accommodated without severe or

unacceptable impact.

In my professional and personal view, the proposed development is appropriately scaled, responsibly managed, and aligned with the needs of the local community. It offers tangible social and wellbeing benefits while maintaining compatibility with surrounding residential streets.

I therefore respectfully request that Sutton Council approve planning application DM2025/01591.
