Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I am writing to formally object to this application, as the proposed development represents an unsuitable intensification of use for a site located within a sensitive residential and school zone. My primary concern is the Pedestrian and Highway Safety risk; the introduction of a high-occupancy facility in such close proximity to a school will place undue stress on the existing road infrastructure, creating significant safety hazards for children during peak hours. Furthermore, the application fails to address the Loss of Residential Amenity that will occur due to the increased noise, light pollution, and general disturbance associated with frequent, large-scale arrivals and departures at all hours of the day. The Inadequate Parking Strategy provided in the proposal is also deeply concerning, as it will inevitably result in displaced parking on narrow neighboring streets, compromising access for residents and emergency services. Finally, the Scale and Character of the proposed building are inconsistent with the surrounding domestic architecture, resulting in an overbearing presence that negatively impacts the visual amenity of the area. For these reasons, I believe the proposal is contrary to local planning policies regarding sustainable development and neighborhood protection.
