Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I am writing to formally object to this proposal based on the following significant concerns regarding highways safety and residential amenity:

Severe Parking Shortfall & Displacement: The provision of only 14 on-site spaces is fundamentally inadequate for the documented peak surge of 250 people. The applicant's "worst-case" scenario acknowledges that 69 vehicles will be displaced onto narrow residential roads, with up to 80 additional vehicles circulating at once. This will result in dangerous levels of congestion and "cruising" for spaces.

Child Safety (Avenue Primary Academy): With over 1,000 pupils nearby, the influx of traffic during peak overlap periods creates an unacceptable risk. Increased roadside parking will severely reduce visibility for children at crossing points and hinder the safe flow of school-run traffic.

Impact on Vulnerable Residents: The site is in close proximity to a care home and elderly neighbours. Obstruction of pavements and driveways by displaced vehicles poses a direct threat to the accessibility and safety of these vulnerable groups.

Late-Night Noise Disturbance: Dispersal at 11:00 PM will cause significant sleep disturbance through engine noise, door slamming, and raised voices in a quiet residential setting, where sound echoes and carries late at night.

Cumulative Impact: Dorset Road is already at capacity due to existing clubs and venues. This proposal ignores the cumulative pressure on the local highway network, which cannot sustain another high-occupancy use without reaching a point of total gridlock.

I urge the planning committee to refuse this application on the grounds of highways safety and the unacceptable impact on local residential amenity.
