Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I whole heartedly support the application DM2025/01591 for a community hall and place of worship that will serve the locality.

I understand that as part of maintaining the property over the last year, a program of tree planting was initiated. This saw over half a dozen trees (cherry trees, fig tree, cherry blossom) planted to augment the existing foliage. In addition to this, rose beds and daffodils have also been introduced. Other ideas that have been floated for the future are that of a herb garden...

The ecology and bio diversity of the area is to be valued. These activities which were partly carried out by volunteers and partly by professionals have demonstrated that this can be a space where different generations and backgrounds can share their love for nature and gardening.

It is envisaged that there will be a number of facilities within the complex including a community hall for the general public, facilities for Muslim women etc. After the local British Muslim community had been hiring general purpose halls to facilitate their community and religious needs and rights, the time has now come for them to have their own facility having demonstrated there is a need which exceeds the current provision.

Having lived in Sutton for over 25 years, I am sure this project will be of benefit to the borough. I am hopeful/ looking forward to this visionary project with facilities benefitting the local community materially, socially and spiritually.
