Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I wish to object to this application due to concerns regarding traffic generation, parking pressure, and cumulative impact on the surrounding residential area.

Dorset Road and nearby streets already experience significant congestion, particularly due to school traffic and existing residential parking stress. In the wider Sutton area, especially around Sutton Station, recent high-density developments have already resulted in narrow two-lane roads becoming heavily congested, with regular on-street parking overspill during weekends and off-peak periods.

Approving a full-time place of worship and community hub at this site is likely to significantly intensify vehicle movements, and events, leading to further parking displacement onto surrounding residential streets.

There are limited access points to the site, and the local road network does not appear capable of safely accommodating additional peak traffic flows without negatively affecting residential amenity and highway safety.

Planning decisions should properly consider the cumulative long-term impact on traffic, parking, and the character of the area before granting permission.
