Name: Mr Giridharan Wijayasingam

Address: 7 Balmoral Way Sutton SM2 6PD

Comment Details

Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment:1. Significant Traffic Generation and Road Safety Risks

The proposal is expected to generate substantial additional traffic, with estimates suggesting over 70 vehicles attending at peak times, and potentially up to 80 vehicles locally during overlapping arrival and departure periods.

The surrounding roads are residential in nature and are not designed to accommodate this volume of traffic. The likely consequences include:

Road congestion and obstruction of access routes

Vehicles blocking junctions and driveways

Increased risk to pedestrians

Reduced emergency vehicle access

Such levels of vehicle movement would materially harm highway safety and residential amenity.

2. School Safety Concerns - Avenue Primary Academy

The site is in close proximity to Avenue Primary Academy, which accommodates approximately 1,034 pupils. The additional traffic associated with this development would significantly increase

risks during school drop-off and pick-up times.

Increased vehicle circulation, parking searches, and informal stopping would create hazardous conditions for children, parents, and staff. The potential conflict between high pedestrian volumes and increased traffic is a serious safeguarding concern.

3. Noise and Late-Night Disturbance

The proposed use could involve gatherings of up to 250 people, with activity extending to approximately 11:00 pm.

This raises serious concerns regarding:

Noise from large groups dispersing

Raised voices and general congregation outside the building

Vehicle engines idling and repeated circulation in search of parking

Car doors slamming late at night

This level of activity would represent a significant departure from the current quiet residential character of the area and would materially harm neighbouring residents' right to peaceful enjoyment of their homes.

4. Impact on Vulnerable Residents

There are vulnerable and elderly residents living nearby who may be particularly affected by increased noise, disturbance, and traffic. The sustained intensity of use could have adverse effects on wellbeing and quality of life for those in close proximity.

5. Overdevelopment and Harm to Character of the Area

The proposed building appears visually dominant and out of character with the surrounding residential properties. Its scale and massing would overwhelm the existing built environment and fundamentally alter the character of the area.

The proposal represents overdevelopment of the site and fails to respect the established residential setting.

Conclusion

For the reasons set out above - including highway safety risks, school safeguarding concerns, noise disturbance, impact on vulnerable residents, and harm to local character - I respectfully request that this planning application be refused.

Thank you for your consideration.
