Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: Re: Planning Application DM2025/01591 - Objection

I formally object to this application on highway safety and traffic grounds.

1. Traffic Congestion & Highway Safety

The proposed change of use to a Place of Worship and Community Hub will materially increase vehicle movements, particularly during concentrated service/event times. Dorset Road and surrounding residential streets already experience peak congestion. The proposal risks:

- Increased queuing and unsafe turning movements
- Illegal or obstructive parking
- Reduced emergency vehicle access
- No robust Transport Assessment has demonstrated that the local road network can safely accommodate this uplift.

2. Proximity to Avenue Primary School - Child Safety Risk

Avenue Primary School is located within approximately 1km and shares the same local access routes. Peak worship/event times are likely to overlap with school drop-off and pick-up periods. This creates foreseeable risks:

- Conflict between high pedestrian volumes (children) and additional vehicle traffic
- Unsafe drop-off behaviour, which is already a nightmare during peak times
- Increased road-crossing hazards
- The application does not adequately address safeguarding of vulnerable road users.

3. Lack of Parking & Traffic Mitigation

There is insufficient clarity on:

- Dedicated parking provision
- Managed drop-off zones
- Event traffic management strategy
- Controlled dispersal plans
- Without enforceable mitigation, the proposal would result in unacceptable highway and pedestrian safety impacts.

Conclusion

Given the significant unresolved highway safety concerns - particularly regarding children - I request that Sutton Council refuse the application unless a full Transport Assessment and enforceable mitigation strategy clearly demonstrate no adverse impact on traffic flow or child safety.
