Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I am writing to formally object to the proposed planning application for the place of worship development in our neighbourhood.

My objection is based on planning and public safety considerations rather than the nature of the institution itself. The proposed site is located in a predominantly residential area includes retired aged people, which has already experiences significant congestion during peak hours. Introducing a facility that is likely to attract high visitor numbers, particularly during specific prayer times, weekends, and special religious events, may substantially increase traffic volume and on-street parking pressure.

Of particular concern is the immediate proximity of the site to a primary school. The area is already heavily congested during school drop-off and pick-up times, creating safety risks for children and pedestrians. Additional traffic and parking demand could further compromise road safety, increase the likelihood of accidents, and obstruct emergency vehicle access.

I respectfully request that the council carefully assess:

The adequacy of the traffic impact assessment

Parking capacity and overspill risk into residential streets

Pedestrian safety measures, especially for school children

Noise and crowd management plans

The cumulative impact on existing local infrastructure

I ask that these factors be thoroughly reviewed before any approval is granted, and that consideration be given to alternative locations better suited to accommodate higher visitor volumes without affecting residential safety and daily life.

Thank you for considering my concerns.
