Comment Details

Commenter Type:

Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I have been a resident locally for a number of decades and practiced as a GP rendering service from two centers in the area for a long time.

I strongly support this application for a number of reasons.

The center will be a key focus for support to ethnically diverse population esp women, children, vulnerable people including lonely people who desperately need local community support.

It will provide safe space to the needy. It will be a center for structured activities and education and well-being.

It could support homeless vulnerable people. It will be a hub for ethnically diverse growing population.

BASMA organizes meetings inviting local residents of all faiths and ages. It helps in international integration and reducing inequalities while promoting social harmony.

There are traffic regulations already in place locally which the local population has always abided by. BASMA volunteers have always actively directed traffic and supported local area.

Prayers are usually in the mid afternoons which don't coincide with the school runs. There are already parking spaces in the proposed location.

There is a desperate need of a community and worship place for local population.
