Comment Reasons:

Comment: Dear Ms Davidson,

I write in support of Planning Application DM2025/01591 in respect of the Ambulance Station, Dorset Road, Belmont SM2 6JH.

I have been a local resident for approximately 12.5 years and am familiar with the character and functioning of the surrounding area. Having reviewed the submitted proposals, I support the change of use from Sui Generis (Ambulance Station) to a mixed-use Class F1 (Place of Worship) and Class F2 (Community Hub), together with the associated extensions.

The proposal would deliver clear and policy-aligned community benefits. The provision of a community hub enabling health and wellbeing programmes, inclusive facilities, educational activities for children, and dedicated space and programmes for women represents a positive contribution to local social infrastructure and community cohesion.

In built form terms, the proposed part one, part two storey extensions and limited height increase appear proportionate and modest. The scale and design are consistent with the surrounding residential context and do not represent overdevelopment of the site.

The use proposed is, in my view, relatively low intensity compared to alternative forms of development that could lawfully come forward on the site. The provision of 12 on-site parking spaces, including 2 disabled bays, together with cycle racks, demonstrates that transport and accessibility considerations have been properly addressed. The retention of greenery further

ensures the site remains visually appropriate within its setting.

It is also noted that Friday prayers will be staggered to avoid conflict with local school pick-up times, reflecting a proactive and responsible approach to traffic management. On this basis, I do not consider that the proposal would give rise to significant or unacceptable traffic, noise, or light impacts.

For the above reasons, I respectfully request that the Council grants approval for Planning Application DM2025/01591.

Yours sincerely,

Tashfin Osmani
