Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing as a resident of Warran Avenue to express my support for the proposed community centre and place of worship.

I particularly welcome the inclusion of a dedicated women's hall and facilities for women's health and wellbeing. In my view, spaces that focus on wellbeing and provide opportunities for social connection are very important, especially for women who may benefit from structured activities and supportive environments.

I also value the programmes being offered for children's education and youth development.

Educational support and positive activities for young people play a vital role in helping children grow, learn and engage constructively with their community.

The on-site parking provision is another positive aspect of the proposal. It demonstrates thoughtful planning and consideration for accessibility, helping to manage traffic and parking demand in a responsible way.

I also appreciate that the centre is in close proximity to my home. Having a community facility within walking distance will make it easier for my family and me to participate in local events and meet other residents. This can help strengthen community ties and create opportunities for positive social engagement.

Furthermore, I welcome the parking arrangements and the decision to stagger Friday prayer times to avoid conflicts with school drop-off periods. This shows careful planning and sensitivity to existing traffic patterns and local routines, which I believe will help minimise disruption.

Overall, I believe the centre will be a valuable addition to the area, offering inclusive facilities and community programmes that benefit residents of all backgrounds. I fully support the application and hope it is approved.
