Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing as an NHS doctor and resident of Warren Avenue to express my support for Planning Application DM2025/01591.

I have reviewed the planning documents, and although lengthy, I have taken time to understand the proposals and how they align with local planning objectives. In my view, the development is consistent with the principles of the local planning framework and broader strategic objectives set out by Sutton Council and the spatial planning aims of the Greater London Authority London Plan. The emphasis on community infrastructure, social cohesion and sustainable local services reflects established planning priorities.

I particularly welcome the modest design of the centre. It appears appropriately scaled and sensitive to the surrounding residential character, which is important in maintaining the visual and environmental quality of the area. A building that blends with its surroundings rather than dominating them demonstrates good planning practice.

From a healthcare perspective, I also strongly support the proposed health and wellbeing workshops. Preventative health initiatives and community-based wellbeing programmes can play a meaningful role in promoting healthier lifestyles and reducing social isolation. As someone who works in healthcare, I recognise the long-term benefits of early intervention and community support in improving individual and population health outcomes.

Additionally, the centre's proximity is a practical advantage. Being within walking distance makes it accessible for local residents and encourages sustainable travel. Accessible community facilities

contribute to stronger neighbourhood engagement and support positive social interaction.

Having considered the proposals, I believe the development will provide meaningful community benefits while respecting planning policy and local character. I therefore support the application and hope it is approved.
