Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I have lived in Sutton for 9 years and moved to Balmoral Way, directly opposite the ambulance station, 6 years ago.

I was fully aware when we moved here that there was an ambulance station opposite, a school, tennis club and also a Bowling Club therefore I am a bit perplexed by some objectors who claim this is very quiet residential area.

I support the application for a variety of reasons.

1) There is no local community centre nearby. As a mother, I have had to go to North Cheam and Carshalton for classes or baby activities. I am pleased to see that there will be a number of community activities for all ages and in my case, women and children. These activities would be for all faiths.

2) I work for NHS England and there is a big push for community led care. The community centre will provide health and wellbeing activities for all ages led by the community themselves which is a key part of the NHS strategy going forward.

3) The proposed development is in keeping with the local area by keeping it ground floor for the most part with a slight extension. This shows the organisers have put effort into ensuring that it is not out of place.

4) The property would have been abandoned had the organisers not bought the property and it

would have been an eye sore. The conversion is in line with National Planning Policy to utilise brownfield sites. I note that if the planning is accepted then the current keep clear lines will be removed therefore allowing more parking

5) The area does get busy during school pick up however I note the prayers are organised around pick up times so the extra visitors should not have an impact on the area. I drop/pick up my daughter from school during the most busy times and have never had issues leaving or entering the area.

6) The use of the building will not be for more than a few hours a day and there is adequate parking facilities/cycling spaces and the majority of users will be able to walk or take public transport. On the flip side, the Ambulance station was used 24 hours a day and we constantly had blue lights shining into our living room and child's bedroom. If the building was developed into flats then this would cause much more of a nuisance.

It is clear that the positives far outweigh the negatives and are in line with planning policies.

There are a number of objections from people far away but as someone who will live opposite the development, I would want the application passed as the net positive benefits would be welcomed by the community for years to come.
