Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing as a resident of Holland Avenue and a mother of two children to express my full support for the proposed community centre and place of worship.

One of the key benefits for my family is that the centre will be within walking distance of our home. This makes it accessible and convenient, particularly with young children, and reduces the need for car travel.

I greatly value the educational and training programmes that are proposed. Opportunities for children's education, homework support, and structured activities are incredibly important for families like mine. In addition, the training and development programmes will provide positive pathways for young people and adults in the community.

I also strongly welcome the separate arrangements for women and the focus on women's wellbeing and exercise programmes. Having dedicated, comfortable spaces for women to participate in health, fitness and wellbeing activities is something that is currently limited locally, and it will make a meaningful difference to many mothers and women in the area.

The addition of further parking spaces in the street is a positive improvement, and I appreciate that the proposed prayer times and programme scheduling have been thoughtfully arranged so they do not clash with school drop-off and pick-up times. This shows careful planning and consideration for local families and traffic flow.

Overall, I believe this centre will provide significant educational, social and wellbeing benefits to

the local community, while being sensitively designed and responsibly managed. I fully support the application and hope it will be approved.
