Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: As a local resident I wholly support the planning application for the change of use of the former ambulance station. I believe the proposal can provide social, educational and recreational benefits, not just to the Muslim community, but to the surrounding community as a whole.

On the subject of busyness and parking, the transformation into a local place of worship means many people close by will be able to take alternative modes of transport, and traffic pressure can be alleviated both in the area, and in other areas many Muslims currently have to travel to in order to pray. Several parking and disabled parking bays have been proposed, and prayers will be staggered as to not conflict with peak times with schools.

Furthermore, as a youth in the area I understand that there is a large lack of social spaces. Often I have to travel much further than the local area in order to engage in activities such as sports, and the new community hub could provide much more local access to the entire community. On top of this, there are further social benefits to the elderly, with young children and educational programmes, and alternative activities that can be held in a centre.

Overall, I believe the proposed place of worship and community hub provides a real benefit to the surrounding community and I support it wholeheartedly.
