Comment Reasons:

Comment:

Name: [Somnath Ray]

Address: [1Sevenoaks Close + SM26NL]

I am a: [Resident / Parent / School-run etc.]

I object to DM2025/01591 because the proposal would cause unacceptable harm to highway safety, parking stress, and residential amenity in a constrained residential area, particularly during school-run and evening peaks.

2) My local context (make this personal and specific)

I live at / regularly use: [Dorset Road].

I regularly experience:

[e.g., "heavy parking during school drop-off/pick-up"]

[e.g., "poor visibility at junctions due to parked cars"]

[e.g., "drivers doing three-point turns/reversing in cul-de-sac roads"]

[e.g., "pavements blocked by vehicles"]

[e.g., "difficulty for buggies / elderly residents / wheelchair users"]

3) Highway safety and school-run concerns

The area is a school-run environment and already has high pedestrian movement. Any increase in drop-offs, circulating traffic, and on-street parking will reduce visibility and increase risk to children and pedestrians.

Personal example:

"At school hours near [Dorset Road], children frequently cross and cars already struggle / visibility is blocked / cars mount the kerb."

4) Parking shortfall and overspill (use applicant's own numbers)

The applicant's own Transport Statement indicates significant overspill:

Worst case refers to up to 80 vehicles locally.

TRANSPORT_STATEMENT-6060376

Only 14 on-site spaces (with an assumption 3 may be staff), leaving 69 vehicles on-street in the worst case.

This level of overspill would lead to blocked driveways/pavements, unsafe manoeuvres and obstruction risks.

Personal example:

"My driveway / my neighbour's driveway is often blocked already on [school days]

"Cars already park close to corners, making it hard to see pedestrians at Dorset Road]."

5) Intensity of use and late-hour dispersal

The applicant's Fire Strategy states a maximum building capacity of 297 persons.

FIRE_STATEMENT_FIRE_STRATEGY_DO...

The Design & Access / Planning Statement references that up to 250 attendees might depart around 11pm for Friday prayers / large community events.

Late dispersal in a residential area can cause disturbance (voices, car doors, engines idling, vehicles searching for parking).

Personal example:

"Noise travels in the evening and residents are disturbed by [existing noise source] already."

6) Constrained road layout / access resilience (cul-de-sacs, turning, obstruction)

Local streets include cul-de-sacs and limited turning space, so extra parking/circulation leads to reversing, three-point turns, and obstruction. Any double-parking or drop-off stopping can cause disproportionate congestion.

7) Cumulative impact (other local venues/events)

Nearby venues already create evening/weekend traffic and parking demand. The proposal should be assessed against cumulative event overlap, not in isolation.

8) What I'm asking the Council to do

I ask Sutton Council to refuse DM2025/01591 due to unacceptable highway safety, parking and amenity impacts.
