Comment:Objection to Proposed Development - Former Sutton Ambulance Station, Dorset Road

I strongly object to the proposed development at the former Sutton Ambulance Station on Dorset Road. The scale, intensity, and nature of this proposal are wholly inappropriate for a quiet, entirely residential area and would cause unacceptable harm to local amenity and neighbourhood character.

The site is surrounded solely by homes and gardens. Introducing a highcapacity place of worship and community hub, operating long hours and attracting large numbers of visitors, is fundamentally incompatible with this setting and would permanently disrupt the residential character of the area.

The proposed extensions and increased height are visually overbearing and entirely out of keeping with the domestic scale of neighbouring properties, resulting in a dominant and intrusive presence within a suburban street.

There is no demonstrated unmet need for this development. Similar facilities already exist within close proximity, and the site is poorly served by public transport (PTAL 1a), making it an unsuitable location for a highintensity use.

The Council's own assessment acknowledges the risk of significant noise and latenight disturbance, including largescale dispersal of visitors late in the evening. This would seriously undermine residents' ability to enjoy peace, privacy, and sleep.

The proposal also relies heavily on onstreet parking, which would lead to congestion, parking stress, and highway safety concerns, to the detriment of existing residents.

Taken together, the noise, traffic, footfall, and lateevening activity would fundamentally alter the character of the neighbourhood and significantly reduce residents' quality of life.
