Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: The proposed site is already located in an area experiencing significant traffic congestion and peak-time pressure. There is a nearby primary school with a capacity of approximately 1,000+ pupils, resulting in very high pedestrian and vehicle movement during drop-off and pick-up times. In addition, the presence of recreational facilities such as tennis courts and an elderly residents' golf facility further contributes to regular vehicle circulation, parking demand, and vulnerable pedestrian activity.

The introduction of a community hall, temple, mosque, church, or any similar assembly use would inevitably generate additional peak-time traffic, particularly during school running time. This would intensify existing congestion, increase on-street parking stress, reduce road visibility, and heighten risks to school children, elderly residents, and other pedestrians.

Given the current cumulative traffic impact and the sensitive nature of surrounding uses (school and elderly facilities), this location is not suitable for further high-intensity community or assembly-based development.
