Commenter Type:

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I am writing to formally object to the proposed planning permission due to serious concerns regarding its negative impact on traffic, safety, and the well-being of local residents.

The proposed development will significantly worsen traffic conditions in an area that already experiences substantial congestion, particularly during school peak hours. The nearby Avenue School accommodates approximately 1,100 students. During morning drop-off and afternoon pick-up times, the roads are already heavily congested, with vehicles queueing and limited safe crossing points for children. Any additional traffic generated by this development would further increase the risk of accidents and endanger students and parents.

Furthermore, the area is home to a large elderly population and is located near Golf Club, which also generates regular vehicle movement throughout the day. Increased traffic flow will make road access more difficult and potentially hazardous for elderly residents who may have limited mobility and require safer pedestrian access.

This is a predominantly residential neighbourhood with narrow roads not designed to accommodate high volumes of additional traffic. Increased congestion will lead to:

Reduced road safety for pedestrians, especially children and elderly residents

Increased air pollution and noise levels

Difficulty for emergency vehicles to access properties

Reduced quality of life for residents

Given these serious concerns, I strongly urge the planning authority to reject this application. The existing infrastructure does not have the capacity to safely manage further traffic increases, and the safety and well-being of the community must be prioritised.
