Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I would like to confirm my strong support for this development. I believe it will provide a valuable community venue, not only for faith-based communities but for the wider local area.

I have reviewed the plans and spoken to the team leading the project. The inclusion of dedicated community space for young people is particularly important, as there is a shortage of youth facilities in Sutton. This proposal directly addresses that need by providing structured and supervised activities in a safe environment.

In addition, the proposed wellbeing events, sporting activities and organised community programmes will deliver much-needed services for the community, by the community. Having a permanent, well-managed space will ensure these initiatives are properly coordinated and accessible.

With an ever-growing elderly population, providing safe and welcoming facilities for older residents is equally important. Spaces that encourage connection and reduce isolation have a meaningful and lasting social impact.

I am confident that this centre will bring real, measurable value to the area and respectfully request that this application receives your support.
