Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I wish to formally object to this application on planning grounds.

While community facilities are important, this proposal represents an inappropriate and over-intensive non-residential use within a quiet, established residential area. The scale and institutional nature of the building would be out of character with the surrounding domestic properties and would undermine the prevailing residential character.

The proposed F1/F2 use would introduce concentrated peak-time activity, including vehicle movements, parking demand and congregation of attendees, which is materially different from typical residential activity (Use Class C3). This would result in unacceptable harm to neighbouring amenity through noise, disturbance, and general activity levels inconsistent with a quiet residential street.

There are also significant highway safety concerns. The surrounding roads are residential in nature and not designed to accommodate institutional-scale peak traffic flows. Insufficient on-site parking is likely to lead to overspill parking, obstruction of driveways, congestion, and reduced road safety.

The site is located approximately 500 metres from a primary school. The surrounding streets already experience congestion and informal parking during school drop-off and collection times. The additional peak traffic associated with religious services and community events would exacerbate cumulative highway pressures and increase risks to pedestrian safety, particularly for young children.

In addition, there is a retirement/elderly care facility within 500 metres of the site. Increased traffic volumes, parking congestion, and heightened activity levels would adversely affect vulnerable elderly residents who rely on safe and low-traffic environments.

Taken together, the proposal would result in cumulative impacts on highway safety and residential amenity that conflict with the Development Plan and national policy set out in the Town and Country Planning Act 1990 and the National Planning Policy Framework.

For these reasons, I respectfully request that planning permission be refused.
