Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: Dear Planning Officer,

I am writing to formally object to the above planning application for the proposed place of worship at Sui Generis (Ambulance station).

My objection is based on the following material planning considerations:

Traffic Impact and Road Safety

The proposed development is expected to generate significant vehicular traffic, particularly during peak worship times which are likely to coincide with existing rush hour periods. The surrounding road network already experiences congestion during morning and afternoon peak hours. The additional traffic volume may exacerbate congestion, increase journey times, and reduce overall road safety.

Proximity to Primary School

The site is adjacent to / in close proximity to a primary school. During school drop-off and pick-up times, the area is already heavily congested with parents, buses, and pedestrians. The introduction of additional traffic during similar time periods raises serious concerns regarding pedestrian safety, especially for young children. Increased vehicle movements, parking pressure, and potential illegal parking could heighten the risk of accidents.

Parking Pressure and Overspill

The surrounding residential streets have limited parking capacity. There is a high likelihood of

overspill parking into nearby residential roads during services and events, which would inconvenience residents and restrict access for emergency vehicles.

Noise and Disturbance

Regular gatherings, special events, and increased footfall may result in noise and general disturbance to the surrounding residential neighborhood, particularly during early mornings, evenings, or weekends.

Suitability of Location

Given the scale and expected visitor numbers, this site may not be appropriate for such a development without significant infrastructure upgrades or a comprehensive traffic management strategy.

I respectfully request that the council carefully consider these concerns and require a detailed traffic impact assessment, parking management plan, and road safety evaluation before determining this application.

Thank you for considering my representation.
