Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: Dear Sir/Madam,

I am writing to raise formal concerns regarding the proposed development of a place of worship within our residential neighbourhood.

The proposed location is directly adjacent to a Avenue primary school, which already experiences considerable congestion during morning drop-off and afternoon pick-up periods. The addition of a facility expected to draw significant numbers of visitors particularly during peak worship times, weekends, and religious events could intensify traffic levels and create heightened safety risks for young children and pedestrians.

In addition, the surrounding roads are primarily residential and not designed to accommodate sustained high traffic volumes. Increased vehicle movements, on-street parking, and potential congestion may negatively affect access for residents, emergency services, and school transport. The cumulative impact on local infrastructure and daily community life should be carefully evaluated.

I respectfully request that the council thoroughly review the traffic impact assessment, parking provisions, pedestrian safety measures, and any proposed mitigation plans before making a decision. Consideration should also be given to whether the site is appropriate for a development of this scale given its proximity to residential housing and a school.

My objection is based solely on planning, traffic management, and public safety concerns, and I

trust these matters will be given careful consideration.
