Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I strongly support the above application, as it will bring significant benefits to the local community for several important reasons.

It's vital that there is community support for our ethnically diverse population, whose needs are varied and evolving. It is essential that we encourage the development of worship and community spaces that can respond to these needs and help address local inequalities. Our growing and diverse population requires a dedicated worship and community centre that can promote social connection, support mental wellbeing, and help reduce loneliness.

The proposed worship timings are typically in the mid-afternoon and do not conflict with school hours, with attendees dispersing before school pick-up times. Additionally, existing traffic regulations are already in place to manage congestion, and the local community has historically complied with these arrangements responsibly.

This facility would also provide invaluable support to elderly residents, offering them a welcoming space to socialise, reduce isolation, and access community-based assistance tailored to their frailty and wellbeing needs.

Furthermore, it would complement local hospitals and existing community services by helping to identify, channel, and support vulnerable individuals within a community setting, thereby expanding the overall reach and effectiveness of local support systems.

For these reasons, I firmly believe this application deserves approval.
