Comment Reasons:

Comment: I am writing to express my strong support for Planning Application DM2025/01591.

I have lived in Sutton for over 20 years, and having grown up in this community, I care deeply about its character, safety and welcoming atmosphere. It is a peaceful area with very little noise pollution, and it has always been a place where people from diverse backgrounds live respectfully alongside one another. I believe this proposal aligns with those values and will contribute positively to our neighbourhood.

In my view, the proposed building is modest in scale and in keeping with the surrounding area. It does not appear overbearing or out of character, and the design respects the existing streetscape. Compared to many alternative developments that could be brought forward, this represents a low-intensity use that is unlikely to place undue pressure on local infrastructure.

The proposal also provides clear community benefits. The inclusion of health and wellbeing programmes, educational programmes for children, and dedicated activities and space for women will create meaningful opportunities for local residents. These types of inclusive facilities strengthen community ties and provide safe, structured environments for learning, support and social connection.

I am reassured by the practical measures included within the application. The provision of 12 on-site parking spaces plus 2 disabled bays demonstrates that access has been properly considered. The inclusion of cycle racks also supports sustainable travel choices. I also welcome the fact that existing greenery is being maintained, helping to preserve the pleasant character of the area.

It is particularly positive that Friday prayers are being staggered to avoid conflict with local school pick-up times. This shows consideration for neighbours and proactive planning to minimise disruption.

Based on the information provided, I do not believe the proposal will cause significant traffic, light or noise issues. Given the modest scale of the building and the planned management arrangements, I consider it to be an appropriate and responsible development for this location.

For these reasons, I respectfully ask the Council to approve Planning Application DM2025/01591.
