Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I am writing in support of the proposed development of a place of religious worship and community hub. Needless to say that it falls fully under the policy of development guidelines and structural plans are very plain and simple with no change to the overall neighbourhood outlook. It is actually away from the street of the school and it will mostly be operational at non peak hours so as not to burden the traffic and the neighbourhood.

Infact the current burden on the Church community at St Johns will be diverted and shared this way there by taking the pressures off that route which actually already is the way of school runs. But the proposed location of development is far from it.

The religious aspect here is imperative to consider. These are people looking for their fair share in the community they have lived for decades with no place to call their own and have used make shift spaces in schools and community churches or even park grounds for religious observance.

Well I believe the Sutton council cannot ignore the community anymore.

They deserve their freedom to Worship where they feel safe and where they will provide other health and well being services for women elderly and the youth of the community.

I have been reading some of the objections & oddly enough from people who are outside this community. It makes me wonder if they have an agenda!
