Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: Dear Sir

I am writing to formally object to the proposed increase in parking on nearby residential roads associated with the new mosque community hub.

According to the proposal, this development is expected to generate an additional 70 vehicles with a further 80 vehicles during peak overlap times. This level of increase is wholly unsuitable for the surrounding roads and will have a serious and lasting impact on safety, accessibility and residents quality of life.

I am severely sight impaired. For me, roads with heavy on-street parking presents an extreme and immediate danger. Parked vehicles significantly reduce visibility, force pedestrians to cross between cars and obscure approaching traffic. Attempting to cross road in these conditions is not merely inconvenient - it is hazardous and places me at constant risk of serious injury.

Blocked and narrowed roads also prevent safe navigation along pavements and crossings.

Increased traffic congestion drivers searching for parking, and vehicles mounting pavements further compound these dangers. The proposal fails to adequately consider the needs of disable residents, which is deeply concerning.

In addition to daytime risks, the night time impact must be taken seriously. the movement of up to 250 people leaving the site, with engines running doors slamming and vehicles manoeuvring late into the evening will create excessive noise and disturbance. For someone with a visual impairment increased night time traffic also dramatically heightens danger, as visibility is further reduced. and hazards are harder to detect.

The development will fundamentally change the character and safety of the area. The current road infrastructure is not designed to support this volume of additional parking or traffic, and no adequate mitigation has been proposed to address the risks posed to pedestrians, particularly

those with disabilities and children.

I respectfully urge the planning authority to reconsider this proposal, give proper weight to disability access and children safety concerns, and reject any plans that would result in increased on-street parking in this area.

Thank you for taking the time to consider this objection.

Yours faithfully

Brian Godley
