Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: I wish to register my support for planning application DM2025/01591. This is a sensible, policy-compliant proposal that will make good use of a vacant site and serve the local community.

Far from creating a parking problem, the proposal reduces the on-site parking provision from the 21 spaces the ambulance station had. The removal of yellow keep-clear lines near the entrance also frees up additional kerbside parking for local residents.

It is also worth mentioning that based on actual travel surveys of the existing congregation, the majority of users walk to worship. The proportion driving alone is very low. This means the impact on local parking and traffic is much smaller than objectors seem to assume.

On this point, this is a well-evidenced application that meets all the relevant policy tests. I am confident the Council will give it a fair and objective assessment based on the material planning considerations.

On this point, Sutton's Local Plan echoes this requirement. The NPPF requires planning authorities to plan positively for community infrastructure. This application is supported at every level of the policy hierarchy, and I would expect the Council to give that due weight.

I strongly support this application and I hope the Council will approve it without delay. The community has waited long enough for this kind of provision.
