Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: Dear Planning Officer,

I strongly object to the proposed change of use from Sui Generis (Ambulance Station) to a mixed-use Place of Worship (Class F1) and Community Hub (Class F2), including the proposed extensions and increase in height.

This area already suffers from severe traffic congestion, particularly during school drop-off and pick-up times. Roads are heavily overcrowded, with frequent double parking, blocked driveways, and unsafe conditions for children and pedestrians.

The proposed development will significantly increase traffic, especially during services, events, evenings, and weekends. This will worsen congestion on an already busy road, increase safety risks for school children, and create further noise and disturbance for residents.

There is also insufficient parking in the area, and additional visitors will result in overspill parking on surrounding residential streets.

Given the existing traffic problems and the scale of the proposed extensions, this development is inappropriate for this location and will have a serious negative impact on highway safety and residential amenity.

I respectfully request that the Council refuse this application.
