Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I wish to register my formal objection to the proposed change of use from the existing ambulance service space to a place of worship, as the proposal raises significant concerns regarding public safety, traffic impact, and community infrastructure. The site lies directly beside a school where congestion during dropoff and pickup periods is already severe; introducing an activity with peak attendance times that may overlap will intensify traffic bottlenecks, restrict safe vehicle manoeuvring, and increase risks to children and pedestrians. Additionally, the current facility provides essential ambulance and emergency support for the wider community, and its loss represents a serious reduction in local emergency response capacity-once displaced, such services are difficult to reinstate and their removal would negatively affect all residents. Replacing this critical, universally accessible asset with a high intensity use in an already constrained location would place further strain on local infrastructure and does not align with the principle of maintaining community cohesion or safeguarding vital public services. I therefore respectfully request that the Council reject the proposal in light of these substantive planning concerns.
