Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: Whilst I have no objection to the proposed building works at this site, I do have serious concerns regarding the anticipated level of use and the associated impact on traffic and parking.

The projected visitor numbers appear disproportionately high in relation to the provision of only 14 parking spaces, some of which will presumably be allocated to staff or event organisers. This raises significant concerns about overspill parking and congestion in the surrounding residential streets.

As a resident of a nearby road, I regularly observe the existing traffic pressures at school drop-off and pick-up times. The nearby school, which has more than 1,000 pupils, already generates substantial traffic, creating congestion at key pinch points. Of particular concern is the timing of Friday prayers, which would coincide with the school's early Friday finish at 2:10pm. Parking activity for the school typically begins from around 1:45pm. Dorset Road, situated directly between the two school gates, experiences especially high traffic volumes during these periods.

Although the application suggests that many attendees will walk to the centre, the supporting comments addresses indicate that a significant proportion of visitors are likely to travel from South Sutton, Cheam, and Worcester Park. It is therefore reasonable to expect that many will arrive by car, further intensifying parking demand and traffic congestion.

For these reasons, I object to the application on the grounds that the anticipated increase in traffic and parking presents a material safety risk, particularly to children attending the school.
