Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: Dear Planning Officer,

I am writing as a local resident of, 112 Banstead Road Carshalton SM5 3NH, to formally object to the planning application DM2025/01591. While I recognize the value of community facilities, this specific proposal represents an overdevelopment of the site that will negatively impact the local area. My objection is based on the following material planning considerations:

1. Highways Safety and Traffic Congestion (Policy 37)

The proposed change of use will significantly increase vehicle movements at peak times, particularly during Friday prayers and community events. Dorset Road is already operating at capacity. The additional traffic will lead to hazardous road conditions and gridlock, contrary to Sutton Local Plan Policy 37, which seeks to ensure that development does not adversely affect highway safety.

2. Inadequate Parking Provision (Policy 37 & Appendix 12)

The application fails to provide sufficient on-site parking for the anticipated number of visitors. Given the low PTAL rating of this location, visitors will inevitably rely on private vehicles, leading to substantial overspill parking on surrounding residential streets. This will obstruct emergency vehicle access and negatively impact existing residents' ability to park near their homes.

3. Impact on Residential Amenity (Policy 29)

The intensified use of the building will cause significant noise and disturbance to immediate neighbours. The congregational nature of a Place of Worship, combined with potentially early morning and late evening operating hours, will result in a loss of quiet enjoyment of our homes.

This constitutes a clear breach of Policy 29, which protects residents from unacceptable noise, vibration, and general disturbance.

4. Character of the Area (Policy 28)

The scale of the proposed "Community Hub" and any associated external alterations [e.g., new signage, lighting, or structural changes] are out of character with the established residential/suburban street scene. Under Policy 28, development must be sympathetic to the local distinctiveness and character of the Sutton neighbourhood, which this proposal fails to achieve.

Conclusion

For the reasons stated above, I urge the Planning Committee to refuse this application. The site is fundamentally unsuitable for a high-intensity use of this nature without severe detriment to the local infrastructure and residential environment.

Yours faithfully,
Rajkiran Manda
